

~~PORTABLE INFLATABLE MASSAGE SUPPORT APPARATUS~~ABSTRACT OF THE DISCLOSURE

5

A portable, inflatable, massage support apparatus. In one embodiment, the present invention is comprised of an inflatable body supporting structure having a top surface and a bottom surface. The top surface and the bottom surface define an enclosure therebetween when the inflatable body supporting structure is inflated. In the present invention, the inflatable body supporting structure has a head end and a foot end. Additionally, in the present invention, the inflatable body supporting structure has massage facilitating features formed into the inflatable body supporting structure. The massage facilitating features are adapted to enhance the massaging of a person when the person is disposed on the inflatable body supporting structure.
